PROFESSIONAL SUMARY

Results-driven software developer around **4+ years** of experience in **Full Stack Development**. Proficient in JavaScript and its frameworks and libraries, with a major focus on React.js and substantial knowledge of Node.js. Strong focus on creating user-centric applications. Successfully reduced application loading times by 30% through optimization. Demonstrated ability to work effectively in cross-functional teams, delivering high-quality projects. Strong communicator committed to enhancing user experiences and contributing to team success.

TECHNICAL SKILLS

Frontend Technologies/Languages/Frameworks : React JS, React Hooks, Redux, jQuery, HTML, CSS, Bootstrap,ES6 & ES7

Programming Languages : JavaScript, TypeScript, PHP(Intermediate level)

Backend Technologies/Languages/Framework : Node JS, Express JS, RESTful APIs, JSON, npm

Database Management Systems : MongoDB, MongoDB Compass, SQL(relational databases)

Version Control Systems/Platforms : Git, GitLab, GitHub

IDE (Integrated Development Environment): Visual Studio Code, Visual Studio Core

Project Management/Agile Tools : JIRA

Operating System: Windows, MacOS, Linux

API Testing Tool: Postman

Collaboration and Communication: Strong collaboration and communication skills; adept in problem-solving, adaptable, proficient in time management, and effective in teamwork.

Unit testing & Debugging

CI/CD Pipeline

Additional Tool: Adobe XD

EDUCATION

- **Bachelor of Engineering** in **Information Technology**
- **Post-Graduation** in **Web Development, Canada**

WORK EXPERIENCE

Front-End Developer (Remote)   August 2021 - April 2024

iLife Technology **(USA)** - *IndiaNIC Infotech Limited*

- Collaborated with cross-functional teams to develop insurance web applications using ReactJS.
- Took ownership of admin and frontend development, ensuring seamless integration.
- Implemented responsive interfaces, enhancing user experience across devices.
- Conducted testing and debugging, resolving UI and performance issues.

- Integrated third-party APIs, enhancing application functionality.
- Reduced application loading times by 30% through frontend asset optimization.
- Contributed to the development of a customer portal, integrating authentication and authorization features for secure user access.

- **Key Project:** Developed secure web applications for insurance companies, optimizing the online application process and integrating health benefits using ReactJS, Redux, Java, PHP, and Python.

Software Engineer   July 2020 - July 2021
Codezeros

- Actively participated in team meetings and brainstorming sessions, contributing ideas and insights that improved product design and development processes by 20%.
- Implemented real-time features, enhancing user engagement.
- Conducted testing and debugging, reducing bug reports by 40% and delivering high-quality applications.
- Collaborated with product managers to translate requirements into technical specifications.
- Utilized ReactJS, NodeJS, and Redux to build scalable applications.
- Led development of diverse web applications, including e-commerce sites and design tools, contributing to a 20% increase in client project completion rate.
- Adopted blockchain technology for safe online apps, increasing transaction security and transparency.

    Key Projects:
- Created a design tool for customizable artwork using Fabric JS, ReactJS, Redux, NodeJS, and MongoDB, supporting cloud-based storage and multi-device access.
- Built a blockchain-based application for secure investment in digital gold assets with React, NodeJS, MongoDB, and web3JS.
- Developed a web application for project collaboration and cryptocurrency remuneration, implementing smart contracts and role-based access control with React, NodeJS, MongoDB, and web3JS.

Software Developer (Co-Op Program)   May 2019 - July 2020
Omex Infotech

- Gained proficiency in Adobe XD, streamlining design-to-development workflow and resulting in faster delivery times.
- Collaborated closely with UI/UX designers to implement visually appealing and engaging user interfaces, ensuring a seamless and intuitive user experience.
- Acquired in-depth training in JavaScript and played a vital role in creating web applications using modern frontend technologies, including JavaScript, CSS, and HTML.

    Key Projects:
- Developed an e-commerce platform with ReactJS, NodeJS, and MongoDB, enabling seamless product discovery, secure transactions, and user authentication.
